Introduction

Welcome to MIKE SDK 2021

In this Release Note you will find information about new features of MIKE SDK, and what you need to know in order to install and get started with Release 2021.

MIKE SDK is a software development kit that allows you to easily write code that accesses and produces files in the main MIKE data formats.

System requirements

The recommended minimum system requirements are:

Fully supported Windows operating systems *	Windows 10 Pro, version 20H2/2009 (64 bit) Windows Server 2016 Standard (64 bit) Windows Server 2019 Standard (64 bit)
Processor	x64, 2.2 GHz (or higher)
Memory (RAM)	2 GB (or higher)
Hard disk	40 GB (or higher)
Monitor	SVGA, resolution 1024x768 in 16-bit color
Graphics adapter	64 MB RAM (256 MB RAM or higher recommended), 32-bit true color
File system	NTFS
Software requirements	Microsoft .NET Framework 4.7.2 or later

- * Fully supported operating systems are systems that have been tested in accordance with MIKE's Quality Assurance procedures and where warranty and software maintenance agreement conditions apply.

Installation

[top](#)

To install MIKE SDK, please go to the 'MIKE SDK' product folder and execute the setup.exe file either on the MIKE 2021 USB or from the downloaded, un-zipped installation files. Press the 'Install' button to begin installation.

License file and dongle

MIKE SDK does not require a license.

Product invocation

The MIKE SDK is used from within a development environment e.g. Visual Studio. To access the MIKE SDK documentation, search for the MIKE SDK Documentation Index.

Support

For general support, please refer to our [FAQ](#).

If you experience any difficulties, or if you have questions, please contact our Customer Success team by e-mail or phone:
